Education *Bachelor of Computer Science, Hons.* February 2012 – November 2015
First class honours. RMIT University, Melbourne, Australia.

Doctorate of Philosophy (Computer Science). February 2016 – Present
RMIT University, Melbourne, Australia.

Skills *Languages:* Awk, Bash, C, C++, Java, Javascript, PHP, Python, and R.
Databases systems: MongoDB, MySQL, and Redis.
Operating Systems: Linux (Debian and derivatives preferred), Unix (Solaris),
Windows, and OS X.
Tools and Environment: GNU Toolchain, Valgrind, Eclipse, Vim, Git, and \LaTeX .
Learning frameworks: QuickRank, JForests, and LightGBM.

Experience *New Media Sales – Webmaster* October 2013 – July 2014
Maintained an E-Commerce website, including both front-end and back-end development, as well as system administration.

RMIT University – Head Tutor/Tutor/Lab assistant July 2014 – Present
Tutored and assisted in labs for the Operating Systems, Database Systems, Computing Theory and Information Retrieval courses. Head tutor for the Programming Fundamentals course. This involved preparation and delivery of both theoretical and practical knowledge and tasks to students, ranging from programming and algorithms to mathematics and statistics.

Envato – Assistant Search Engine Analyst (Intern) January 2016 – April 2016
Worked with the Discovery team to continue improving search effectiveness across some of Envato's most popular marketplaces. Involved creating tooling for analysis of query logs to gain insights into the search behaviour of users on Envato market.

RMIT University – Programmer May 2017 – September 2017
Data preparation and scripting for the RMIT Computing department for the Australian Research Council's "Excellence in Research for Australia" rankings. Involved writing tools to automatically extract citation information from both Google Scholar and Microsoft Academic, as well as further data preparation and analysis.

Microsoft Research – Research Intern June 2018 – September 2018
Worked with the SQL and the Language and Information Technologies teams to understand user behavior in the email search domain. Involved analysis of user behavior logs from a set of human intelligence tasks related to email search.
